B1. Courses leading to approved awards of the University

1. Section A1.2 of the Academic Regulations includes a list and definitions of awards offered by the University. Programmes of study approved by the University may only lead to awards from this list. However, there are a number of courses of the University validated prior to the approval of the Academic Regulations which lead to awards which are not as yet defined within the Regulations. These are courses leading to the awards of Certificate, Diploma and Graduate Diploma in relation to which a generic definition encompassing the diverse characteristics of those courses has yet to be approved.

2. For the time being, any course leading to an award which is not listed and defined in section A1.2 of the Academic Regulations is recognised as leading to an approved award of the University provided it was initially validated and approved in accordance with the quality assurance procedures of the University applicable at the time.
