Handwriting Legibility Scale (HLS)

Name/ID of writer: ________________________________ Male / Female. Age: __________

Name of assessor:________________________________Date:______________________

Profession: _______________________________________________________________________

Number of years of experience working with children in this capacity: __________________________

Learning to produce legible handwriting at sufficient speed allows children to keep up with class work and
demonstrate their knowledge. However some children struggle to learn this skill and it is important to
identify those with difficulties.

The purpose of this scale is to obtain your overall impression of the quality of the written product (not
the content of the writing), to establish the extent to which the handwriting allows for effective
communication. The scale provides an overall evaluation to identify those with difficulties in producing
legible and/or sufficiently fast handwriting. Please note that if a difficulty is identified, then a more detailed
analysis of the handwriting may be required in order to plan how best to support the child to develop their
skill.

The scale is designed for children aged 9 years and older. It contains five components, each of which should
be rated on a five-point scale (1-5), with higher scores indicating poorer performance. Compute the total
score by summing the five component scores.

The assessment should be based on a piece of ‘free writing’ produced by the child, ideally on an A4 sized
sheet of lined paper. The text should be approximately 10 lines in length.

The focus of this scale is on legibility of the handwriting. However, since speed is also an important
element you should also time the writing task. Start to time when the child begins to write and mark their
text after six minutes. This will give you a record of the child’s rate of production, useful for comparing
against other children of the same age and for monitoring performance over time.

Sometimes legibility is affected by spelling errors. You should therefore indicate below whether or not the
child has made spelling errors in the text.

Legibility
Sum score (from over page): __________________________

Speed
Number of words produced in 6 minutes: __________
[Include all abbreviations, unfinished and crossed out words]

Spelling
Did the child have many spelling errors in the text compared to other
children in the class? Yes / No
December 2017 RIDD

For the first three components, consider your overall impression of the writing:

A. Legibility - An overall impression of global legibility based on your first reading of the text.
1 – On first reading, all words are legible
5 – On first reading, only few words are legible

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

B. Effort - An overall impression of the amount of effort required for you to read the script the first time.
1 – On first reading, no effort is required to read the script
5 – On first reading, the script is extremely effortful to read

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

C. Layout on the page - An overall impression of the layout of writing on the page. Well organised handwriting is consistent, with elements appropriately positioned in relation to each other (e.g. the position of the margin, placement of letters on the baseline, spaces within and between words).
1 – Very good layout on the page.
5 – Very poor layout on the page.

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Now focus on individual letters/words in more detail:

D. Letter formation - An overall impression of letter formation. Well formed letters are appropriately shaped, contain all necessary elements, neat letter closures and are consistent in size and slope.
1 – All letters very well formed
5 – Most letters very poorly formed

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

E. Alterations - An overall impression of the attempts made to rectify letters within words. Includes the addition of elements, re-tracing or re-writing of letters.
1 – There are no additional elements, re-tracing or over-writing of letters within words.
5 – Most words contain additional elements, re-tracing or over-writing of letters.

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Sum score** (quality of the written product): ____
