

Oxford Brookes Sustainability Engagement Strategy

VISION:

To create a culture of sustainability awareness, opportunities and engagement programmes, enhancing student and staff experience and 'upskilling' our community to create a behaviour change sustainability legacy.

KEY DRIVERS:

1. Maintain and enhance our reputation as a sustainable and socially responsible organisation.
2. Enhance the student and staff experience.
3. To 'upskill' our community to create a global sustainability legacy.
4. Aligning with the United Nations sustainable development goals and our guiding principles, confidence, enterprising creativity, connectedness, generosity of spirit and inclusivity.

OBJECTIVES:

- Create sustainability awareness, education and training among staff and students to create a global legacy.
- Deliver behaviour change programmes enabling staff and students to integrate sustainability into workplace and everyday practices.
- Create engagement opportunities and support to our students and staff community.
- Create a collaborative sustainability-led culture to deliver our guiding principles, through effective communication, empowerment of staff and students and creating confidence to share ideas and deliver initiatives.
- Specify, evaluate and deliver SMART targets and KPIs through an action plan. Progress and impact to be measured and reported at least annually.
- Offer oversight and involvement of students, staff, unions and key stakeholders in the strategic direction of our sustainability policies, strategies and action plans, through advisory and steering groups.
- Adopt best practice and create partnerships, locally and globally.

This strategy will be reviewed annually by the Environmental Sustainability Team and signed off by the Vice Chancellor Group.
